

HNRS 1008

Honors Introduction to Life Sciences for Non-Majors

Are you majoring in: Engineering, English, Physics, Humanities, Philosophy or another non-biology major and looking to fulfill your Gen-Ed requirement in Biology?

This Honors Biology for Non-Majors course will be taught with an emphasis on current biology and current biological research at LSU and at large.

HNRS 1008 will be taught by:

Evanna Gleason – neurobiology and the brain

Mike Hellberg – marine ecosystems

Special Guests: plants and ecology

The course is designed to be more interactive and discussion oriented than a standard lecture course.

The laboratory part of HNRS 1008 will NOT be like other lab courses, it will consist of: lab experiments, open discussion and Q&A sessions, science communication workshops, movies, field trips, and more.

Spring, 2015: T, Th 1:30 – 3pm

and ONE of the following labs sections:

Monday 1:30-4:30pm

or Monday 4:30-7:30pm

BIOL 1007/1008 is a year-long sequence that can be taken together or separately and which satisfies general education requirements for biology. Class size is limited to 44 students.
